CASE STUDY · GOVERNMENT

Securing a Wellington government facility — with live operations throughout.

- Access control upgrade
- CCTV upgrade
- Staged delivery
- Operations never paused

Swipe to see how →

01 THE CHALLENGE

Upgrade everything. Stop nothing.

Stricter access requirements

Who can be where — including our own installers — is tightly controlled.

Higher compliance obligations

Every change has to stand up to scrutiny and be documented.

Zero tolerance for downtime

The building had to keep running, and stay secure, every day of the project.

02 OUR APPROACH

Scope. Stage. Deliver.

1

Scope

Site survey, access and compliance requirements agreed before any work.

2

Stage

Work broken into zones, scheduled around live operations.

3

Deliver

Each zone cut over, tested and signed off before the next began.

ZONE 1 — EVERY ZONE LIVE

03 THE RESULT

Upgraded.
Live throughout.

- **New access control across the building**
- **Upgraded CCTV coverage**
- **Operations ran throughout**
- **Documented and signed off, zone by zone**

RED WOLF
HIGH LEVEL SECURITY

Can't afford downtime?

We plan upgrades around live operations — so your site stays secure the whole way through.
